

Sirs,

Please do not remove the allocated white space for unlicensed wireless microphone use.

This would cause great harm and financial cost to Housed of Worship and small wireless audio users.

The cost incurred would include either factory re-tuning the wireless transmitters and receivers or cause for the purchase of new systems.

The cost of my systems are \$1500. each of which we use 14 systems on a regular basis in our church services.

My systems operate in the 748 – 865 Mhz band.

Thank you,

Steve Hill
